PRODUCT INFORMATION AND APPLICATION USE

Niron Compression Fittings are designed to be joined by means of the compression joining technique in accordance with ASTM F2389. Fittings are manufactured with coarse threads on each side which tighten the fitting to secure an internal EPDM o-ring. The dimensions of the fittings and sockets are in accordance with the requirements of ASTM F2389. The fittings may be disassembled and reused at a later date. They are very handy for quick repair situations. Fittings are injection molded and are solid grey in color.
