

Certificate of Electrostatic Safety

Presented to
NUPI S.p.A.

for
The SMARTFLEX Piping System

This is to certify that the SMARTFLEX piping system audited by Wolfson Electrostatics at the University of Southampton has been rigorously tested and has been found to be safe in respect of electrostatic ignition hazards.

The SMARTFLEX products encompassed in this audit and detailed in Wolfson Electrostatics Technical Report 257/GLH are suitable for use in fuel handling applications at forecourts involving gasoline (petrol) liquids and vapours and Diesel.

The conditions covered in section 4 of the Wolfson Electrostatics Technical Report 257/GLH will apply.
